1. GETTING STARTED

This *User Manual* will help you to familiarize yourself with the **Scramble** application. The dialog boxes and controls in this *User Manual* may appear different from the dialog boxes and controls that appear on your computer screen.

This *User Manual* describes all the steps necessary to complete a scramble format event.

Please take a moment to familiarize yourself with the text conventions, terms, and controls used in this *User Manual*.

1.1 Text Conventions

The examples below explain the specially formatted text used in this *User Manual*.

- Dialog boxes and control names appear in bold type: **Select Member** dialog
- Keyboard key names appear in bold type: **Home, End, Backspace, Tab**
- Keyboard keys that must be pressed at the same time to perform a task appear in bold type with a plus (+) between the key names: **Alt+H**
- Drives appear as capital letters: drive C
- File names appear in italics with an initial capital letter: *Setup.exe*
- Command line statements appear in lower case bold type: **a:\install**
- Names of icons appear in bold type: **My Computer** icon
- Menu items, option buttons, and check boxes appear in bold type: **Programs, Accessories, Tournament** option, **Use 18-Hole Factor** check box

1.2 Terms

You can use either a single-button mouse or a multiple-button mouse with the **Scramble** application.

If you have a multiple-button mouse, the left mouse button is the primary mouse button, unless you have configured it differently. Any procedure that requires you to click the secondary button will refer to it as “the right mouse button.”

If you have a single-button mouse, pressing the **Ctrl** key while clicking the mouse button is the same as clicking the right mouse button.

This *User Manual* uses the following terms.

Term	Meaning
<i>Scramble</i>	Name of application.
Press	Strike a key from the keyboard.
Type	Strike a key from the keyboard to display text on the screen. Do not press the Enter key after entry is complete, unless instructed to do so.
Enter	Type the entry, then press the Enter key.
Point	Position the mouse pointer until the tip of the pointer rest on whatever you want to point to on the screen.
Click	Point, press and immediately release the left mouse button without moving the mouse.
Double-click	Point, press and immediately release the mouse button twice without moving the mouse.
Drag	Point and then hold down the mouse button as you move the mouse.
Choose	Click a command button. Click an item from a menu bar or dropdown menu.

Select	Click a command button. Click an item from a menu bar or dropdown menu. Click an option button to make a black dot appear. Click a check box to make an X appear. Click and item in a list box, then click OK , or double click and item in a list.
Clear	Click an option button to make the black dot disappear. Click a check box to make the X disappear.

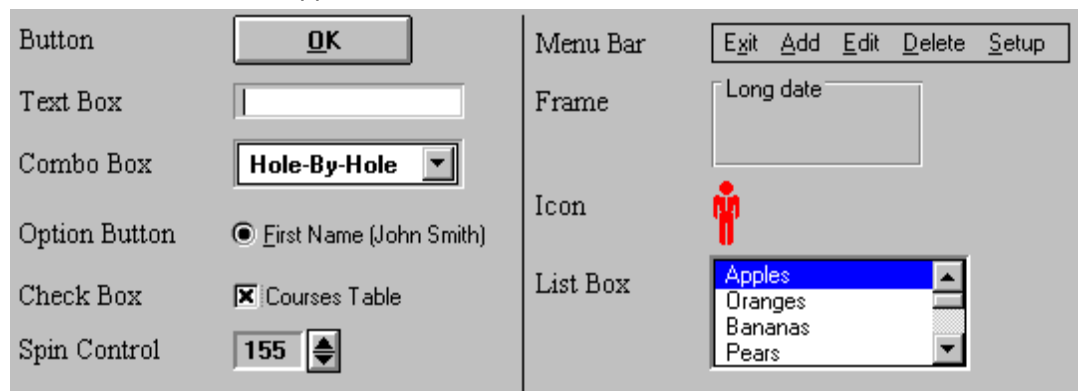

In Windows, the terms *choose* and *select* have different and specific meanings. Selecting an item usually means mark it with the selection cursor, which can appear as a highlight, a dotted rectangle, or both. You also select *check boxes* and *option buttons* in dialogs. Selecting alone does not initiate an action.

You choose an item to carry out an action. For example, choosing a command button or menu item might open a dialog or carry out a command. You often need to select an item before you can choose it.

1.3 Controls

You can use a combination of mouse and keyboard techniques. For example, you could click an item to select it, and then press **Enter** from the keyboard to choose it. When a procedure in this *User Manual* says to choose an item, generally you can use whichever method you prefer.

This section gives basic information about controls and their functions. Throughout this *Guide*, the control name will be in bold type. For example, select **OK** or select **Courses Table** check box. The controls found in the **Scramble** application are similar as shown below.

1.3.1 Button or Command Button

You choose a *command button* to initiate an action, such as carrying out or cancelling a command. Common command buttons are **OK** and **Cancel**. They are often located along the bottom or on the right side of the dialog.

A command button, followed by an ellipsis (...) or a double greater-than sign (>>) opens another dialog box.

Unavailable command buttons are dimmed. The currently selected button has a darker border than other buttons. You can choose the currently selected button, simply by pressing the **Enter** key.

To choose a command button, click the command button. Or press the **Tab** key until the button you want is selected, and then press the **Enter** key.

1.3.2 Text Box

You type information into a *text box*. When you move to an empty text box, an *insertion point* (a flashing vertical bar) appears. The text you type starts at the insertion point.

If the box you move to already contains text, and the text is highlighted, any text you type replaces it. You

can also delete the existing text by pressing the **Delete** key or **Backspace** key.

To select text in a text box, drag the pointer across the text, or double-click a word to select one word at a time. Or press and hold down the **Shift** key while pressing an **Arrow** key.

1.3.3 Combo Box

A *combo box* appears initially as a rectangular box containing the current selection. When you select the down arrow in the square box at the right, a list of available choices appears. If there are more items than can fit in the box, scroll bars are provided.

To open a combo box and select an item:

1. Click the arrow at the right to see a list of available choices.
2. Click the up or down scroll arrow, if visible or drag the scroll box to move to the item you want to select.
3. Click the item.

1.3.4 Option Button

Option buttons represent a group of mutually exclusive options. You can select only one option at a time. If you already have one option selected, your current selection replaces it. The option buttons are, generally enclosed in a frame. The selected option button contains a black dot. Names of unavailable options are dimmed.

To select an option button, click the option button.

1.3.5 Check Box

A *check box* means you can select or clear an option. You can select as many check-box options as needed. When a check box is selected, it contains an **X**. Names of unavailable options are dimmed.

To select or clear check boxes, click the check box.

1.3.6 Spin Control

The *spin control* is a control that works with another control, such as a text box to increment and decrement values. It can also, scroll back and forth through a range of values or a list of items.

To continue to increment the value, click the up (or right) arrow of the spin control and hold down the mouse button, then release the mouse button when the desired value is displayed. Likewise, repeat the latter by clicking the down (or left) arrow to decrement the value. If a flashing vertical bar appears when you drag the mouse cursor over the area left of the up (or right) and down (or left) arrows, the control contains a text box. If the area is highlighted or selected you can change the value or list with the up and down (or left and right) arrow keys from the keyboard.

1.3.7 Menu Bar

The *menu bar* contains a list of menu items. Some commands carry out an action immediately; others display a dialog so that you can select options, or a dropdown menu. Dimmed menu items are unavailable.

A menu item followed by an ellipsis (...) opens another dialog.

1.3.8 Frame

A *frame* groups the controls together. The name of the frame usually describes the group of controls.

1.3.9 Icon

Icons are small pictures that represent something. For example, the icon in the previous illustration represents a male. Some icons act as a command button.

1.3.10 List Box

A *list box* displays a list of choices. If there are more choices than can fit in the box, scroll bars are provided so you can move quickly through the list. Some list boxes are accompanied with a text box. If you type a letter in the text box the list box scrolls to match the letter you type.

Usually, you can select only one item in a list box. There are some cases when you can select more than one item.

To select a single item from a list box:

- Use the method as described above or
- Click the scroll arrows until the item you want to select appears in the list
- Click the item, and then choose the appropriate command button or double-click the item to select it and complete the command all in one step.

To select multiple sequential items in a list, click the first item you want to select, and then drag the cursor to the last item you want to select.

To cancel the selection, click any item in the list or click the first item you want to select, press and hold down the **Shift** key, and click the last item you want to select. Both items, and all items in between, are selected.

To select multiple non-sequential items in a list, press and hold down the **Ctrl** key, and click each item you want to select.

To cancel a selection, press and hold down the **Ctrl** key, and click the item again.

1.4 System Requirements

The application will operate on the following operating systems and configurations:

- PC with a 266 MHz or greater Pentium-class processor
